

The NJ do not call registry is a prized gift to the hard working people of New Jersey, and senior citizens.

Working in New Jersey means long commutes and loads of traffic resulting in dreadfully long days. The last things we want to do when finally returning home, is take calls from telemarketers, and clear the answering system of telemarketer messages.

We have absolutely no interest in taking the calls, nor would we ever even consider buying anything from a telemarketer.

Furthermore, senior citizens must be sheltered from these vultures, who, all to frequently target the elderly.
